

# Hadi Sleiman

Beirut, Lebanon — [sleimanhadi@outlook.com](mailto:sleimanhadi@outlook.com) — +961-71448260 — [LinkedIn Profile](#) — [Portfolio](#)

## Education

---

**Saint Joseph University, BE in Computer And Communication Engineering** *Sept 2019 – Jan 2024*

## Experience

---

- **Software Developer Freelance, Binary Cords, Beirut**

*Aug 2024 – Present*

- Developed a multi-shipment management system with dynamic quotations and real-time booking via Stripe, integrating DHL API for real-time shipping rates.
- Architected an admin panel using Laravel and Livewire, incorporating role-based access control (Spatie Laravel Permissions) for managing quotations and bookings.
- Designed a comprehensive warehouse management system leveraging Laravel, Livewire, and integrated document generation using PHPWord and Maatwebsite Excel for dynamic reports (e.g., product inventory, order processing, and supplier transactions).
- Integrated PHPMailer for email notifications and utilized Laravel's robust features for managing data and generating real-time insights for decision-making.

- **Software Developer, Arz General Trading, Beirut**

*May 2023 – Present*

- Developed an ERP system using Livewire, enabling dynamic and real-time functionalities across client management (B2B, B2C, POS), inventory, order processing, and sales tracking.
- Integrated logistics management with waybill tracking, ensuring seamless client orders and sales operations across multiple business units.
- Implemented robust salesman management features for performance tracking and integrated real-time reporting with dynamic insights using Laravel's Eloquent ORM and Livewire.
- Designed and developed dynamic reports and dashboards, enhancing decision-making through data-driven insights using Livewire components and Laravel's built-in reporting capabilities.

- **Software Developer Freelance, Above The Fold, Beirut**

*Apr 2024 – Jul 2024*

- Integrated third-party APIs for real-time weather data and developed interactive JavaScript-based report charts for tracking agricultural data.
- Designed interactive charts using JavaScript to visualize medication usage and harvest data, enhancing data-driven decision-making.

- **Software Developer Intern, 7Sensing Software, Paris**

*Apr 2023 – Aug 2023*

- Developed and improved depth estimation models using TensorFlow and CNNs, implementing data augmentation techniques to improve model robustness.

- **Software Developer Intern, 7AIFIX, UAE**

*Jun 2022 – Oct 2022*

- Developed a scalable CMS website using Node.js, Express, and Vue.js, ensuring efficient content management with MongoDB and implementing API design.

## Skills
